

CAL POLY ITE

Keeping Momentum

Continuing success after a strong start to the year.

General Meetings 192-106 | 11 AM-12 PM | Catered
1/7 Kick-Off | 1/14 Fehr & Peers | 1/14 DKS (Evening) | 1/21 CCTA
2/4 SLO Airport | 2/18 Omni-Means | 3/3 AECOM

Speed Interviews & **CE/ENVE Career Fair**
1/12 | 12 PM-3 PM 1/15 | 9 AM-2 PM
Bonderson 104 Chumash Auditorium

Stay Tuned...

Student Leadership Summit, Planathon, LA Firm Tours, & more!

TRANSPORTATION ENGINEERING STUDENT PROJECT AREA

Spotlight: Exploring Data Driven Models of Transit Travel Time & Delay

"My research focuses on using higher resolution data instead of stop level to improve transit efficiency and reliability. I've been processing Portland TriMet datasets to quantify congested segments, provide methods to improve operations, and update routes and schedules. I've also been updating and modifying the transit trip time model for a more accurate look at the system."

-Bobby Sidhu, Master's Candidate

We welcome new project ideas and collaborative opportunities, let us know at calpolyite@gmail.com! More at calpolyite.com/projects

From the President

It may be a new calendar year, but we're starting quarter two on the Cal Poly campus and couldn't be more excited. A huge thank you to all of our members and supporters who made last quarter as successful as it was! I couldn't believe it myself, but between all the exciting meetings, social, and professional events, our membership shattered our previous record with **98 members** now.

We haven't forgotten about those three pillars we established either. Social events like bonfires and pie parties brought our members together outside regular meetings, a biking safe info session and Build an Engineer Day reached out to peers and young minds to encourage cycling and safe transportation practices, and those TESPAs keep rolling in!

We're not slowing down. With booked general meetings, high student registration for the Student Leadership Summit, speed interviews to prep our members for the career fair, and never-ending fun with the problem-solving Planathon, I'd bet this quarter will keep up with the last.

Thank you for being a part of this chapter, we couldn't operate without the enthusiastic support!

-Krista Purser
